PROFILE

Cross-functional profile spanning IT systems, projects, product and development, in IT since 2016 including 7 years owning IT systems. I build web products with AI agents: I scope, write specifications, split the work into small increments, then review, test and ship the generated code. I have used generative AI intensively for about two and a half years; since 2024, I have designed 2 automotive applications this way, including BonneOccaz, through to production.

FEATURED PROJECT

BonneOccaz.fr

Beta product

An automotive marketplace for searching, publishing and comparing listings, enhanced with decision tools, professional workflows, an AI automotive advisor and a platform help assistant.

EXPERIENCE

Full Stack Builder / JS/TS Developer

2024 - Present · Independent · BonneOccaz.fr and a confidential project

Two automotive web applications, including BonneOccaz, designed and built with the assistance of AI agents. The second project remains confidential at this stage.

Projects started alongside my role at Normandie Structures in 2024-2025.

- Designed 2 automotive applications, from idea to MVP and a beta in production, by scoping needs, journeys and backlog
- AI-assisted development: specification, review, refactoring and testing of every release (React, Next.js, TypeScript, Supabase/PostgreSQL: Auth, RLS, Realtime)
- Shipped a RAG/CAG assistant over 97 FAQ entries and 11 Pro sections, evaluated on 32 questions (top 3, 90% threshold)
- Automated delivery (Git/GitHub, CI/CD, Vercel, Resend) and maintained the applications in production

IT Manager

2018 - 2025 · Normandie Structures · Normandy, France

Autonomous ownership of information systems, technical projects and business technology needs.

- Owned IT systems single-handedly for 7 years: hardware, software, network and business apps
- Gathered team requirements, then selected and deployed suitable solutions
- Provided user support, incident management and training
- Coordinated vendors and led technical projects through to go-live

Apprentice Project Manager

2016 - 2018 · Renault Cléon · Cléon, France

Built two business applications in an industrial environment.

- Developed an ASP.NET MVC (C#) application for new-vehicle parking management
- Developed a PHP inventory and tooling application using QR codes
- Designed and operated the related MySQL and SQL Server databases

EDUCATION

2016 - 2018 · Software Engineering Manager - French national qualification, RNCP / EQF level 6 (4 years of higher education) · CESI Rouen · 2 years after the BTS, work-study programme.

2016 · BTS SIO - SLAM software track · La Châtaigneraie, Mesnil-Esnard

LANGUAGES

French: native · English: B2, reads and writes technical material regularly

SKILLS

Frontend & product : React · Next.js · TypeScript · JavaScript · HTML5 / CSS3

Backend & data : Node.js · Supabase · PostgreSQL · SQL · REST APIs

AI agents & delivery : AI coding agents · Generative AI · LLM · Project instructions · Testing & code review

Systems & collaboration : IT strategy · Project Management · Business analysis · Requirements gathering · User support
