Bryan DUPRESSOIR

FULL STACK BUILDER / AI-NATIVE

Full Stack Builder AI-native · JS/TS Developer

Agentic development · Generative AI · React · Next.js · Supabase

bryandupressoir@live.fr 06 17 81 61 32 Vandrimare, Normandie

PROFILE

Full-stack JS/TS developer in IT since 2016, including 7 years owning IT systems. Since 2024, I have designed 2 automotive applications from scoping to production by directing AI coding agents: specifications, implementation, testing, review and delivery.

FEATURED PRODUCT

BonneOccaz.fr

Beta product

An automotive marketplace for searching, publishing and comparing listings, enhanced with decision tools, professional workflows, an AI automotive advisor and a platform help assistant.

- AI advisor: identify needs and find a vehicle on the platform
- RAG/CAG assistance: internal corpus, validated citations, injection tests and public/Pro separation
- Listings, favourites, messaging and moderation
- Price indicator, ownership cost and tax estimation
- Consumer and professional account experiences

EXPERIENCE

Full Stack Builder / JS/TS Developer

2024 - Present

Independent automotive products

Two automotive web applications built with AI from the outset, including BonneOccaz. The second project remains confidential at this stage.

Projects started alongside my role at Normandie Structures in 2024-2025.

- Designed 2 automotive applications, from idea to MVP and a beta in production, by scoping needs, journeys and backlog
- Built in React, Next.js, TypeScript and Supabase/PostgreSQL (Auth, RLS, Realtime) by directing AI coding agents
- Shipped a RAG/CAG assistant over 97 FAQ entries and 11 Pro sections, evaluated on 32 questions (top 3, 90% threshold)
- Hardened production through AI-assisted audits: regressions, access control and performance
- Automated delivery (Git/GitHub, CI/CD, Vercel, Resend) and maintained the applications in production

IT Manager

2018 - 2025

Normandie Structures · Normandy, France

Autonomous ownership of information systems, technical projects and business technology needs.

- Owned IT systems single-handedly for 7 years: hardware, software, network and business apps, from audit to upkeep
- Selected and deployed business applications based on an analysis of team needs
- Provided support, incident management and training to drive change adoption
- Led technical projects and coordinated vendors through to go-live
- Built the company website; preliminary structural design with RFEM/RWIND

Apprentice Project Manager

2016 - 2018

Renault Cléon · Cléon, France

Built two business applications in an industrial environment.

- Developed an ASP.NET MVC (C#) application for new-vehicle parking management
- Developed a PHP inventory and tooling application using QR codes
- Designed and operated the related MySQL and SQL Server databases
- Ran the full Agile cycle: requirements, specifications, development and testing

SKILLS

FRONTEND & PRODUCT

React · Next.js · TypeScript · JavaScript · HTML5 / CSS3 · Tailwind CSS · Responsive Design · UX · Product discovery · MVP scoping · Rapid prototyping

BACKEND & DATA

Node.js · Supabase · PostgreSQL · SQL · REST APIs · Auth · Storage · RLS · Realtime · Data modelling

AI AGENTS & DELIVERY

AI coding agents · Generative AI · LLM · Project instructions · Testing & code review · Git / GitHub · CI/CD · Vercel · Resend · RAG / CAG

SYSTEMS & COLLABORATION

IT strategy · Project Management · Business analysis · Requirements gathering · User support · Training · Vendor coordination · Agile / Scrum

PRODUCT LOOP

Understand -> Design -> Build -> Ship -> Learn

Featured product · BonneOccaz, in beta

EDUCATION

Level 6 RNCP - Software Engineering Manager

CESI, Rouen · 2018

BTS SIO - SLAM software track

La Châtaigneraie, Mesnil-Esnard · 2016

TARGET ROLES

- Full Stack Builder
- Full-Stack JS/TS Developer
- Product Engineer
- React / Next.js Developer
